ACHIEVEMENTS

HackAlgeria – Algerian Hackathons Platform 2020
HackAlgeria is a competition of developers to come up with courageous and innovative ideas that will help to emerge stronger from the current difficult situation caused by Covid-19

Teamwork | Work ethics | Project management | Decision making

Sentiment analysis of Algerian facebook comments 2020 - CERIST
I used Deep Learning tools to create a smart computer system that understands the sentiment of the Algerian commentary.

AI | Deep Learning | Python | New approach

Creation of a web service for the Algerian customs 2018 - CNIS
The objective of this web service is the exchange of data automatically between the port of Algiers and customs.

Design | Realization | Java

Realization of dynamic web applications 2018 (Freelance)
I used to build websites with database and user interaction.

Backend | Frontend
